GLADS

1934

Paul-Ham Gardens
Lewiston, Idaho, U.S.A.

U. S. Department of Agriculture

OUR INTRODUCTIONS

During the past four seasons, we have offered seven new varieties of *Gladiolus* to the trade. The reception has been favorable and many recommendations have been received from our customers. From thousands of seedlings, only one has been chosen for introduction this season. Be sure to try at least some of these.

Attention (1933). Predominating color peach red with Martius yellow throat. A Van Fleet seedling but of stronger color. The florets are of medium size, plain petaled, wide open. Excellent substance. Tall, strong growth. Never crooks. Five flowers open.

Blue Moon (1931). In addition to its color, its outstanding feature is earliness, being the first to bloom. Good size, up to 4½ inch diameter. Mauve to Chinese violet or hyssop violet, Rood's violet in center. Extra good propagator. Medium height. Several blooms open. Does not crook.

Eugenie (Piper 1932). Very fine novelty color: geranium pink with strong blotches of lemon chrome, rose doree line surrounding blotches. Placement and size good. The color is very pleasing and it makes a good spike.

Mountain Rose (1933). For some time the trade has needed an early lavender and we believe this variety will be useful in filling this want. It is a seedling of Sweet Lavender and thus gets its earliness. The color is much better, however, being in effect a rose lavender. Good substance. Plain petaled. About six open.

Recovery (1934). A fine spike of large flowers of remarkable substance. Bloomed out eleven large flowers in a temperature well over 100°. Color is almost self and could be classed as either dark pink or light red. Remarkable substance.

Swansdown (1933). This is a very lovely white. Florets are of medium size and of an extremely lovely form. The ruffling gives it a lacy, dainty appearance found in no other white. It has the chasteness of Europa. About six well-placed flowers out.

Wings of the Morning (Miller 1931). A Phipps seedling of outstanding substance. An early bloomer. Color: eosine pink, shading to begonia rose and to white in throat; small blotch of rose doree in throat. Good size. About 16 buds, with nine or ten out. Straight spike. Will stand hottest weather but repays good culture.

Prices on the above are found in list of varieties. To get you to try them we offer a large bulb of **all seven varieties** for \$3.00.

Paul-Ham Gardens

"Our Business Is Growing"

821 SEVENTH AVENUE
LEWISTON, IDAHO

Perhaps, some of our old customers and friends have been wondering what has become of Paul-Ham Gardens this season. For many years past we have gotten out a fall list but last autumn we decided, in view of financial conditions, to postpone all advertising until spring. We had planned to get out our catalog January 1st, but other matters have made us about three weeks late. Be that as it may, here we are again with a fine list of varieties for you.

The Gladiolus industry, like all others, has keenly felt the depressing conditions of the past three years and, judging by the low prices at which bulbs are now being offered, recovery has not made as much progress in this line of business as it has in some others. But we believe this condition will soon pass. All growers report inquiries and orders are coming in at a fast rate and this will soon bring about better conditions. The bank holiday last spring eliminated six weeks out of the best part of the selling season, practically all growers having a deficit as their pay for a year's work. Therefore, the present season has opened with the lowest prices on record, this in spite of a short crop. This condition is unnatural and will be remedied when growers make enough sales to pay last year's losses. The moral is self-evident. Buy now while prices are about half what they should be.

Code regulations are still being worked out for this industry. It is possible that these provisions may forbid our old custom of including extra bulbs and giving extra count. The giving of discounts may be restricted. Under these conditions, we will be forced to discontinue some of our old practices along this line, and pledge ourselves to abide by all N.R.A. or A.A.A. restrictions. But in view of these indications, it may be to your advantage to buy early while we are still able to treat you as liberally as formerly.

Crop was grown in new soil, with sufficient moisture for irrigation. Stock treated before planting to prevent disease. Patch was carefully checked over almost every day to destroy rogues. We guarantee all stock free from disease and true-to-name and will replace all found otherwise.

Careful checking by ourselves and federal inspector has found no Glad thrips. Under present conditions it is impossible to say how long this condition can be maintained. We are trying to keep out this pest by fumigating every bulb we buy with naphthalene immediately upon receipt. If you wish we will place naphthalene flakes in sacks before shipment. This is believed to be the easiest and best way of fighting the pest.

We do not substitute varieties unless given your permission. If out of a size, we will substitute the next size unless forbidden. We can't guarantee bulblets to sprout nor warrant bulbs to grow or bloom. We can't tell under what conditions you grow them and that is not our responsibility. It is our purpose to see that you receive stock of first quality.

We want you old customers to know we appreciate the business we have received, and we thank you for the many other customers who have been added to our list through the recommendations of old patrons.

We are following the style of descriptions used last year. We are trying to make this as clear as possible and a careful reading of page five will be of value. We realize the imperfections of the listings but believe that these can be improved in the years following. We have tried to be fair in our opinions, to you, to the introducer and to ourselves. We mean for this catalog to be of value to you and can only tell how worth-while it is by the business we receive from it.

LUCIFER

Lucifer is one of Errey's best. See page 17.

NERISSA

Nerissa is one of the most promising of the newer Australian varieties. Priced on page 20.

Varietal Descriptions and Price List

The pages immediately following contain prices and descriptions of varieties now in stock in salable quantities.

In arranging this part of the catalog, we have striven to give a maximum amount of information in the briefest space possible. In the top portion of the page are given the descriptions, the first line being a rating of the main qualities of the specific variety, arranged in tabular form. Following this, our personal observations and opinions are given. In other words we try to give you the stark facts about each Glad as well as the impression the variety has made upon us. In the lower portion of the pages, the price list appears for the kinds listed on that page. We have tried to arrange this so as to be easily understood. Where not specified, all bulbs and bulblets are quoted at price per each, and, where not stated otherwise, prices are prepaid in the United States and Canada, provided order amounts to \$1. (Foreign orders of more than \$5 sent prepaid, except items marked collect.) No order accepted for less than \$1. In many cases wholesale prices, f.o.b. Lewiston are given in the list, so as to allow growers and dealers who buy in quantity to purchase at very low rates. We are glad to give special quotations on large lots. Write us.

The tabular descriptions used in the list are the results of last two years' observations. It may be that the headings and abbreviations in columns need some explanation. "Sub.", meaning substance has been determined from thickness of petals, ability to stand heat and wind in field and behavior after cutting. Substance is classified by using initials of Fair, Good and Excellent. Under type, most varieties come under the abbreviations for Grandiflorus, Primulinus or Primulinus Grandiflorus. Ruffled varieties are marked "R". The blooming season listings are designated as Early, Early Midseason, Midseason, Late Midseason and Late, the initials of these being used as abbreviations. The diameter of a representative floret is expressed in inches, while the height is shown as Short, Medium or Tall. We believe "No. Out" is self explanatory.

To conserve space the following abbreviations are used for names of introducers or originators: A, Austin; Alk, Alkemade; B, Barth; Bet, Betscher; Br, Brown; Bur, Burbank; C, Coleman; Cr, Crow; D, Diener; Dec, Decorah; Dg, Miss Douglas; El, Ellis; Er, Errey; F, Fischer; Gil, Gilrey; Hol, Holland; Hr, Hornberger; K, Kunderd; Kin, Mrs. Kinyon; Kir, Kirchoff; Lem, Lemoine; M, Mair; Mil, Miller; Mrs. H, Mrs. Hoeg; Mz, Metzner; Pal, Palmer; Pf, Pfitzer; Pp, Piper; Pr, Prestgard; Sal, Salbach; St, Stevens; Sy, Symons; V, Vaughan; Vel, Velthuys; Vil, Vilmorin.

Terms and Discounts

Stock will be held until April 1st, if desired, if 25% is paid down to hold order, but discounts not allowed unless full amount is paid at time of order. Net cash before shipment or balance C.O.D. Bulblets should be ordered early as most varieties will be planted before April 1st.

One at one-eighth of ten price; five sold at half the ten price; 25 at the 100 rate; 200 at the 1000 rate; pint at the quart rate. No item filled for less than 10c unless a less price for a certain quantity is quoted in list.

Sizes: Large, above $1\frac{1}{4}$ inches; medium, between $\frac{3}{4}$ and $1\frac{1}{4}$ inches; small, under $\frac{3}{4}$ inch. No. 1, over $1\frac{1}{2}$ in. diameter; No. 2, $1\frac{1}{4}$ - $1\frac{1}{2}$ in.; No. 3, 1 - $1\frac{1}{4}$ in.; No. 4, $\frac{3}{4}$ - 1 in.; No. 5, $\frac{1}{2}$ - $\frac{3}{4}$ in.; No. 6, $\frac{1}{4}$ - $\frac{1}{2}$ in. Expensive bulblets selected and liberally counted.

On account of the present fluctuation of foreign exchange, we ask customers in foreign countries to remit by international money order or United States exchange. Foreign currency will be credited at exchange rate current when received.

All stock is offered and orders accepted subject to prior sale.

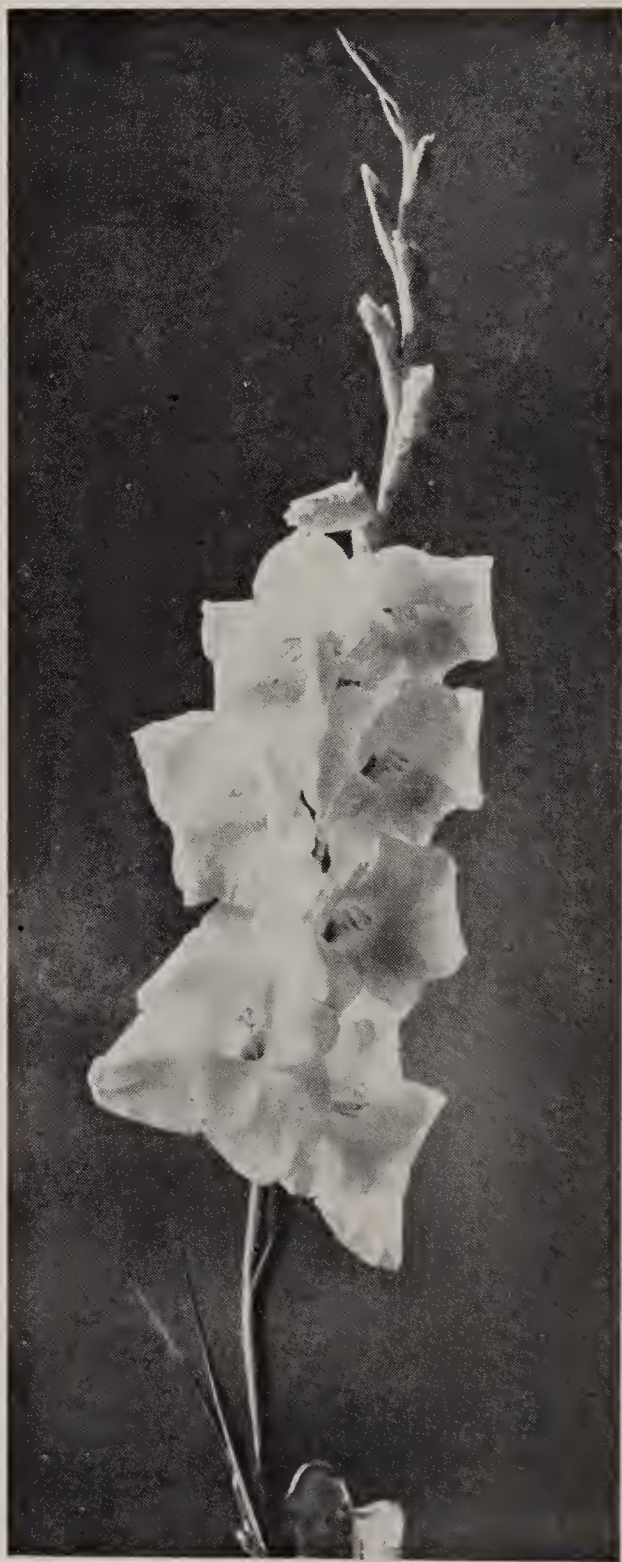

DISCOUNTS: The following discounts apply only to prepaid prices. Prices listed "collect" are net cash. Discounts do not apply to collections. Until March 15th: 15% on orders of \$5 or more, 20% on orders of \$15 or more, 25% on orders of \$25 or more. After March 15th, these discounts are reduced by 5% in each case. These are cash discounts, a 20% cash discount being equal to 25% extra in bulbs.

We appreciate remittance by money order. Personal checks are credited subject to payment. If you send stamps for small orders, please send the 3c denomination, as we sometimes become overstocked on the larger ones.

COMMANDER KOEHL

Commander Koehl has won a lot of blue ribbons. See page 10.

MAID OF ORLEANS

Maid of Orleans, listed on page 17, is one of the loveliest whites.

Variety — Originator — Color and Markings	Sub. Type	Blm. Sea.	Dia. In.	Ht.	No. Out
ACADIA (Pal) Geranium pink, cream throat, pink feather <i>This variety looked very good the past season.</i>	G PG	M	5	T	6
AENNE RAHMSTORFF (Barth) Deep rose red, black throat.... <i>A good grower of remarkable substance.</i>	E G	E	4	T	7
AFLAME (Hr) Flame red, penciled lighter, large size <i>An outstanding variety. Size and color having made it much in demand.</i>	G PG	EM	6	T	6
A. H. WOODFULL (Er) Silvery mauve, darker throat, exhibition <i>Distinctive color. Excellent exhibition spike.</i>	G G	EM	4½	M	9
AIDA (Pf) Deep violet blue, red throat, very early <i>Best of its color at anywhere near price. Slow germinator but many blooms from bulblets.</i>	G G	E	4	M	6
ALBATROS (Pf) Purest white, sometimes poor placement <i>Very pure color. In some sections the leading white.</i>	G G	M	5	T	6
ALLAWAH (Er) Lavender violet, red blotch, strong <i>Strong grower but not very clear color.</i>	G G	M	4	T	6
AMAZON (Gilrey) Light rose pink, white throat <i>An Australian variety much in demand.</i>	F G	M	5½	M	5
AMBROSIA (K) Old rose, yellow blotch, overlaid red <i>One of Kunderd's better known later ones.</i>	G G	M	3½	M	6
AMETHYST (Sy) Lilac rose, purple feather, exhibition <i>A show Glad that leads in its color.</i>	G G-R	EM	4½	M	8
ANNEHURST (Piper) Pure pink, almost self color <i>This one deserves trial for its lovely color.</i>	G G	M	4½	M	6
APHRODITE (Barth) Light salmon pink, cream throat <i>An interesting new German variety.</i>	G G	EM	4	T	5
ATTENTION (Blake) Peach red, Martius yellow throat <i>A Van Fleet seedling of much stronger color and better substance. Strong wiry stems and good placement.</i>	G G	E	4½	T	6
AVE MARIA (Pf) Medium violet blue, red feather <i>This is one of the best light blues. Makes fine spike and blooms are well placed.</i>	G G	EM	4½	T	8
AVIATOR (Kel) Light mauve, center dotted yellow <i>Well recommended English exhibition variety.</i>	G G	M	4	M	7

Variety — Originator — Color and Markings	Sub.	Type	Blm. Sea.	Dia. In.	Ht.	No Out
LOUIS HEMON (Lem.) Rose red with deep yellow throat <i>Very striking, flashy sort. Not a big flower but certainly showy.</i>	G	G	M	4	M	8
LOYALTY (A) Clear medium yellow, deep center <i>A good yellow. Strong grower. Ruffled. It ranks among the best.</i>	G	G-R	M	4½	T	7
LUCIFER (Er.) Orange scarlet, purple red blotch <i>Probably best of Errey's 1931 introductions. Fine color and size and many out at once.</i>	G	G	EM	5	T	9
LUDWIG VON BEETHOVEN (Pf.) Slate, crimson penciling <i>Tall grower. Blooms of good size and widely spaced.</i>	G	PG	EM	5	T	7
MAGNA BLANCA (Sal.) White with yellow blotch <i>Certainly a tall grower. Should be supported to prevent crooking and falling over.</i>	G	G	M	5	T	6
MAGNET (Cr.) Very deep yellow self <i>This is a good grower and color is fine.</i>	G	PG	LM	4	M	6
MAID OF ORLEANS (Pf.) White with cream throat <i>One of the best whites. Lovely form and becoming very popular.</i>	G	PG	LM	5¼	T	7
MAMMOTH WHITE (Pf.) Very pure white, best exhibition <i>This is our favorite. Has fine color and makes an immense spike. Don't do without this any longer.</i>	G	G	L	6½	T	8
MANOAH (NZ) Medium shade of mauve pink <i>Well recommended and rare New Zealand variety.</i>	G	G	M	4½	M	8
MAORILAND (Whiteley) Salmon red, overlaid and flecked blue <i>A new Zealand smoky of attractive coloring.</i>	G	G	M	5	M	5
MARMORA (Er.) Lavender gray, with petunia purple blotch <i>This variety is becoming plentiful and cheap but you can't beat it at any price. It is a wonder from all points of judging.</i>	E	G	M	5½	T	10
MARNIA (Kemp) Orange with yellow throat <i>In its color class this variety is the best at the price.</i>	G	G	LM	4	M	7
MAROCCO (Pf.) Deep red, flecked black, white midrib <i>Another outstanding variety whose good propagating qualities have brought it down to a low price. Its shiny dark color is very attractive and we place it at the top of its color class.</i>	G	G	M	5	T	8

MOUNTAIN ROSE (Blake) Rosalene pk., flushed rosalene purple <i>One of our 1933 introductions. An early rose lavender of good form and substance, that we believe will be useful in filling a want for a dependable early commercial variety.</i>	G	G	E	5	M	6
MOUNT HOOD (Pp.) White, small rose purple feather <i>Piper came near getting a world-beater in this one. Large size and lovely ruffling.</i>	G	G-R	EM	6	T	6
MR. FREDERICK CHRIST (D) Pure pink, yellow tht., red dots <i>Very fine exhibition sort but poor propagator.</i>	G	G	M	5¾	T	8
MRS. F. C. HORNBERGER (Horn.) Good commercial white <i>If you want a good late-blooming white, you should plant this in quantity.</i>	G	G	L	4	M	8
MRS. GALBRAITH (M) Salmon pink, mottled and dusted ruby <i>This is well worth having. A good color and a good performer.</i>	G	G	M	4½	M	8
MRS. LEON DOUGLAS (D) Salmon pink, cream throat, dotted <i>Most everyone has seen this one, but if you haven't enough Douglas, don't neglect to stock up. Many people criticise it but it is probably the best known and best loved Glad of them all.</i>	G	G	LM	6	T	8
MRS. RAY P. CHASE (Mil.) White, yellow throat, flecked pink <i>Plant this Glad so it does not bloom in hottest weather and you are likely to get a very marvelous white. Hot weather muddies the color.</i>	E	G	EM	6	T	7
MRS. S. A. ERREY (Er.) Salmon orange, deep orange throat <i>An outstanding exhibition variety. Makes tremendous spikes of large flowers. Pick early so the sun does not have a chance to fade it.</i>	G	G	EM	5	T	10
MRS. T. E. LANGFORD (Cr.) Pink, lighter center, buff throat <i>A good spike of a very lovely color.</i>	G	G-R	LM	4½	M	8
MRS. THOMAS RATTRAY (Ratray) Rose pink, white throat <i>This is a real exhibition Glad. In Australia they bloom out 15 or 16 florets. Very poor propagator but a wonderful variety.</i>	E	G	LM	4¾	T	12
MRS. T. J. KNUDSON (V) Medium violet blue, purple feather.... <i>Looks like the best of Vaughan's new blues. Its color is outstanding.</i>	G	G	EM	4	T	6
MRS. VAN KONYNENBURG (Pf.) Light violet, deep violet fth. <i>One of Pfizer's earlier blues and now grown in quantity. Blooms sometimes face upright but we have always considered it a fine variety.</i>	G	G	M	4	T	6

QUEEN MARY (M) Cream white flecked rose pink <i>Often considered queen of all for exhibition. Not a good propagator and always in demand. Does not do its best here on account of heat.</i>	G G-R	LM	4	T	10
QUEEN OF REDS (Tennant) Choice exhibition crimson <i>A new crimson that is highly recommended.</i>	G G	M	5	T	6
RAMESES (St.) Red purple with deep crimson blotch <i>Here is a husky grower. Very tall and has large size and fine color. Be careful in bulblet germination.</i>	G G-R	EM	6	T	7
RAPTURE (Pal.) Geranium pink, pinard yellow throat <i>This appears to be quite a Glad. Probably not up to Picardy but very few are.</i>	G PG	M	5	T	7
RECOVERY (Blake) Salmon rose red, flecked darker <i>Our only introduction for this year. A fine spike of a good color, and of substance that will stand extreme temperatures.</i>	E G	EM	5	T	11
RED GLORY (Pp.) Crimson scarlet, with darker throat <i>This resembles Purple Glory a lot but color is lighter and brighter. Bulblets are very poor germinators.</i>	G G-R	M	5½	T	6
RED LORY (Er.) Deep rose red, crimson blotch <i>This magnificent Australian exhibition sort is gaining favor at a fast rate. One of the very best.</i>	G G	M	5¾	T	12
RED PHIPPS (Briggs-Long) Brilliant light scarlet <i>J. D. picked a good one when he brought this out. Not a monster but it is going to be one of the best commercial reds. Very good color.</i>	G G	EM	4½	T	8
RIDEAU (Pal.) Orange salmon, throat dotted crimson <i>The pastel coloring of this variety is quite attractive.</i>	G PG	EM	4	T	6
RITA BECK (F) Pure pink, scarlet penciling <i>One of the prettiest Glads in the book. It is subject to disease and does not always succeed but a good spike is indeed a lovely thing.</i>	G G	LM	5½	M	6
ROI ALBERT (Lem.) Smoky rose, crimson blotch feathered yel. <i>A good smoky that is becoming popular fast. It's a good propagator, too. Fine color.</i>	G G	M	4½	M	6
ROSA BELLA (Pf.) Pure pink, white throat, feathered lavender <i>Here's a good new one. Has been rare and hard to find until lately. Worth your trying. Bulblets sometimes slow germinators.</i>	G G	LM	4½	M	6

Personal Opinions

Quite often we are asked for our opinion on certain varieties and customers sometimes desire that we make recommendations. The value of these recommendations is doubtful, no matter from what source they come. We find some of the most competent Glad growers differing sharply concerning many of the best-known varieties. However, we offer the following ramblings for what they may be worth.

By knowing the country of origin of a variety we may get some inkling as to its characteristics. American breeders seem to be more varied in their aims than those of most countries, however, as a whole, they try to especially meet the demands of their patrons for large size of flower. Our American introductions have been rather shy of good yellows, whites and blues, most of the outstanding varieties of these colors being of foreign origin. In fact, most of the best of these shades have been supplied by the great German firm of Pfitzer, which is near the top in other colors as well. The English strive for excellence of form and color and favor the smaller-flowered varieties more than Americans do. The French place color first and are especially fond of contrasting blotches. Of late years, progressive firms have kept a careful eye on Australia and New Zealand. Some of the introducers from "down under" have not been as careful in selection of colors as they should have been, but many wonderful new ones are coming from that part of the world. Some of these are of mammoth size while others open more florets than any others ever introduced. No one country has a corner on all the worthwhile kinds of Glads.

Now for variety recommendations. In whites, we favor Jonkheer Van Tets, Mammoth White, and Maid of Orleans. Blues—Blue Admiral, Pelegrina, Ave Maria, Aida. In yellows, Yellow Perfection and Canberra, with Golden Chimes making a bid to be classed with the leaders. How about reds? Commander Koehl, Red Lory, Lucifer, Pfitzer's Triumph, and Dr. Bennett, while in the black ones we choose Marocco. Lavenders: Minuet (of course), Berty Snow, Dr. Moody. Pinks, salmon pinks, etc., include so many that it is hard to make a choice: Mrs. Douglas, W. H. Phipps, Picardy, Mildred Louise, Coryphee, Mrs. Rattray, Jessie, Esme Desailly. Orange: Mrs. Errey, Tawhaki, Betty Nuthall. Purple: Troubadour, Rameses. Smokies: Marmora, Mother Machree, Bagdad.

After reading over the preceding list we wonder if these are the ones we would choose if we could not have others, too. There is room for doubt, but we know they are safe to recommend to others. But notice some we overlooked: Moondara, Frederick Christ, Mrs. Langford, Nerissa, Paul Deschanel, Our Selection, Paul Cambon, Netherlands Prince, Pride of Portland, Queen Mary, Red Phipps, Roi Albert, Emile Aubrun, Salbach's Orchid, Spirit of St. Louis, Sultan, Smiling Maestro, Wolfgang von Goethe, Yvonne, Moorish King, Le Habitant, Libelle, John Ramsay, Heathfield, Hercules, Helen Jacobs, Veilchenblau, Gertrude, Director, Dr. Shook, Charles Lindberg, Big Nan, Blue Danube, A. H. Woodfull, Aflame, and dozens more probably as good. It is almost a hopeless task to select the best dozen or even the best hundred. The choice is up to you and you probably will like many that we do not place so highly.

Still having a little space, we will pass on a little growing information for the inexperienced grower.

The three essentials of Glad growing are: good bulbs, good soil with sufficient water, and good culture.

The first may be obtained from any reliable dealer.

The soil may vary in composition and still be good. Some grow Glads in sand, some in peat and others in various other kinds of dirt. It is necessary that the ground be clean (that is free of pests or conditions conducive thereto), that it have sufficient strength to give good growth, and that it be well drained. Too heavy clay soils are not recommended. Shade and tree roots should be avoided.

Good culture covers a lot of things: Soil should be thoroughly prepared before planting, put in best possible condition. Treatment of bulbs for disease is a good precaution, either one of the patent preparations or common lye (one can to 25 gallons of water) being recommended. Naphthalene flakes are suggested as thrip treatment, but our experience is that they seem to damage lye-treated bulbs. Treatment is dangerous to bulbs starting to sprout roots. Depth of planting varies from 2 to 6 inches, depending on size of bulbs and kind of soil. Bulblets should be cracked or soaked before planting. Cultivation should be thorough but not too deep. Don't keep patch wet all the time. Go easy on irrigation early part of season and increase when spikes start up. Fertilize if necessary but avoid overdoing it. Dig your bulbs before tops die down in fall. They deteriorate if left in wet ground too long. Store in cool, dry place in shallow containers. Further cultural advice will be given on application but please be specific in asking questions.

If You Want Some New and Different Glads

TRY OUR INTRODUCTIONS

Listed on Page Two of This Book

All of these new varieties have been introduced at moderate prices and now we are offering a bulb of all seven kinds for \$3.00. This includes a full-size bulb of

RECOVERY

our only introduction of 1934. This Glad has a bright, pleasing color, and any variety that opens 10 or 12 large blooms during the hot weather of August in the Snake river valley deserves more than a scant glance of inspection.

You will find that all of our varieties possess better substance than most and they are all good propagators.

We have received letters of commendation on all of our previous introductions from people of reputation as judges of good Glads, in many cases being accompanied by orders for larger amounts of stock. We believe the same will prove true with Recovery, stock of which is limited. We are reserving all bulblets and planting stock, so please don't ask for small sizes of Recovery until 1935.

Delphinium Seed

Last year, for the first time, we offered delphinium seed to our patrons and quite a few availed themselves of the opportunity to obtain strictly high-grade stock.

This year we are again offering the strain especially propagated by Mrs. Joel Jenifer of this city. Common commercial seed of delphinium are practically worthless but the strain we sell comes from high-grade plants which are rigorously rogued, so no poor stock is left to spoil the seed crop.

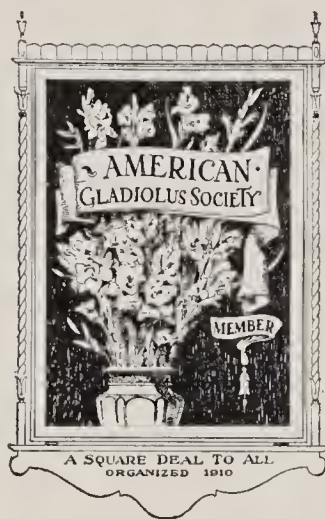

Characteristics are: Large flowers; tall spikes (5-7 ft.); disease resistant and practically mildew proof; lovely colors, including the whole range of blue shades, pink tintings, with bees of many colors. Flower forms run from the singles through various degrees of doubleness.

Care should be taken in germination, and we have found it best to plant seed in a cool, shaded place. Do not allow it to dry out. While with good care some spikes will be produced the first year, do not expect first-class flowers until second season.

Supply of seed is limited. Packets, 50c and \$1.00.

GLAD SOCIETIES

We are not publishing a list of all the Societies to which we belong as we would not be able to make it complete this early in the season. Suffice to say, we believe that almost all of these organizations are doing a good work and we try to boost them with our support. If you are a Glad fan or commercial grower, belong to the A. G. S. and your sectional and state society as well. We will be glad to forward your membership to any society and we wish to commend the following, especially:

American Gladiolus Society. This organization is one of the leading floral organizations of the world and doubtless much of the popularity of the Gladiolus is due to its efforts. Its organ, the *Gladiolus Review*, is invaluable to those who are interested in the flower. Dues are \$2 per year and the monthly magazine is worth more than that.

New England Gladiolus Society. Although organized to serve New England, this society has a very large membership all over the world. They are offering an outstanding bargain this season in giving year books for 1933 and 1934, together with a valuable color chart, for only \$1. We assume that the supply of last year's books is limited so urge early application.

British Gladiolus Society. This society publishes a fine year book, full of information from all over the world, and giving us especially the British viewpoint on the Glads of today. This organization, led by two of the world's greatest enthusiasts, is doing a fine work. Amateur dues are only \$1.00; trade members, \$2.00.

Canadian Gladiolus Society. Our friends across the line are well organized and are publishing a quarterly comparable to the others mentioned. The Canadians are real flower fanciers and are doing especially good work in meeting the thrips situation. Dues are \$2.

BEST BARGAINS, 1934

Offer No. 22

Ten each of any fifteen of the following varieties for \$3.00. Large bulbs, 1¼ inch up. Shipped express collect. Labeled. No more than twenty bulbs of any variety allowed in one collection. Pick out your varieties.
